The undersigned, auditors for the year ending March, 1878, have carefully examined the foregoing accounts, and find the same to be correctly cast and properly vouched.

STEPHEN KENRICK,	} Auditors.
ISAAC N. BLODGETT,	

Fire-Wards' Report.

The fire engineers, for the town of Franklin, in 1877-8 submit the following report:

The fire department consists of eight engineers, 100 engine men, 50 to each engine, and 13 hose-men, running on Kenrick Hose Carriage No. 1.

The fire apparatus consists of Franklin Engine No. 1, located on Main street, west side of the river, with hose carriage, about 500 feet good 2 inch leather leading hose, pipes, nozzles, buckets, axes, and other equipments necessary for a well organized engine company, all in good condition and ready for use;

Stark Engine No. 3, located on Central street, Franklin Falls, with hose carriage, 500 feet of good leather leading hose, pipes, nozzles, axes, buckets and other necessary material for a well organized and effective company, all in good order and ready for use:

C. C. Kenrick Hose Carriage No. 1, with 800 feet new 2 1-2 inch leather leading hose, 2 play pipes, 1 branch connection with reducers and enlargers to couple to two in hose, 2 buckets, 1 fire axe and other equipments to complete the outfit for a well organized hose company.

This is a new organization. The town at the last annual meeting having "waked up" to the fact that our fire apparatus was not sufficient for the demand made upon it, especially the insufficient quantity of hose and the entire absence of hooks and ladders, very generously voted to appropriate \$2,500 to be expended for fire apparatus under the direction of the fire engineers and selectmen. After repeated inquiries your committee came to the unanimous conclusion that leather hose was, all things considered, the most economical to purchase. They accordingly, after getting proposals from Boyd & Sons, of Boston, Josiah Gates & Son, of Lowell, Darrow & Turner, of New York, Samuel Greer, of Philadelphia, Samuel Eastman & Co., of Concord and J. H. Pettengill, of Franklin, were unanimous in awarding the contract to Samuel Eastman & Co., of Concord. The hose is first class in every respect and fully warranted.

After making many inquiries and getting price lists from various hose carriage makers, your committee sent an agent to Lowell, Chelsea and Chicopee, Mass., to see hose carriages for sale and ascertain, as far as possible, in regard to the efficiency of the extinguisher hook and ladder truck.

The agent of the committee reported in favor of buying a second hand carriage, owned by the city of Chelsea, at the price of \$350; also in favor of the "Champion" hook and ladder truck. It was voted in committee to purchase the hook and ladder truck; by reason of the tax not being collected it has not been done, but it should be at the earliest practicable time, as your committee consider it one of the most essential pieces of apparatus that any town can own.

The small traps and tools necessary for a hose company the engineers have from time to time furnished, so that to-day we have as good a hose carriage, hose and company as any in the State. We are, however, hiring a place to house it that is no proper place, and we recommend the town, as soon as may be, to procure a more fitting place with better accommodation.

RESERVOIRS.

The reservoirs on the east side of the river have kept full all the time during the year. The reservoir near the bridge has had a fair supply, but the reservoir near the depot for most of the time has no supply, and the prospect of a full supply from the present source is, to speak as favorably as we can, not very encouraging.

FIRES.

Fire in dwelling-house owned and occupied by T. D. Burleigh, March 30, 1877. Loss, \$175. Cause unknown. Insured.

Fire in store and dwelling of H. J. Odell, May 24, 1877. Loss \$450. Cause, over-heating stove-pipe. Insured. No alarm.

Dwelling-house and barn of Joseph Welch, burned December 8, 1877. Loss, \$550. Cause unknown. Insured. No alarm.

March 8, 1878. The dwelling-house and barn of Enoch G. Adams, destroyed by fire. Cause, lamp dropping out of lantern into the hay. Loss \$3,000. Insured \$2,500.

Wm. Porter's Sons, lanterns,	15 30

\$4,520 27

RECOMMENDATIONS.

We recommend on the principle of economy that as soon as may be practicable the town purchase a second-class steam fire engine, and either run our hand engines wholly by volunteers, or perhaps sell one of them. We estimate that the town can and will save \$700 per year by the change. Enough may be saved by the arrangement in about five years to pay for a good steamer, to say nothing of the advantages of steam over muscle. And in this place it is proper to state that the Winnipiseogee Paper Co., by W. F. Daniell, has offered (in case the town will buy a steam fire engine) to house the apparatus and furnish team and driver free of charge. Such an offer, we think, ought to be met in a proper manner by other public-spirited citizens.

We think the balance of the appropriation of last year should be placed in the hands of an appropriate committee, to invest in a village hook and ladder truck, with four or six "Champion" extinguishers attached, as we certainly think it one of the most efficient of anything that has yet been put in the market. In the early stages of a fire it can in many cases be stopped by the use of this apparatus before it is possible to get on a stream of water, being always ready at a moment's notice and throwing so small a quantity of water as not to damage buildings or furniture. With water alone sometimes more damage is done by the water than by the fire, which by the use of the chemical is entirely obviated.

All of which is respectfully submitted.
